

Adding Another Product Line

Adcco Technology will automatically display at least one Product line, or the default number set by an admin user. To add a new line select "Add a Product" from the Product Data Section.

The screenshot shows the 'Product Data' section of a software interface. At the top, there are two buttons: 'Select All Products' and 'Combine Selected Products'. Below this is a table with the following columns: Code, Qty, Package Type, SKU, Description, NMFC, Class, Weight (LBS), L x W x H (IN), and HazMat. The first row contains the following values: Code (empty), Qty (3), Package Type (Boxes), SKU (empty), Description (empty), NMFC (empty), Class (60), Weight (251), L x W x H (10 x 15 x 19), and HazMat (checkbox). Below the table is a yellow button with a green plus sign and the text 'Add a Product'.

This will add a new blank line for the user to update. Add the details to the required fields.

The screenshot shows the 'Product Data' section of a software interface, similar to the previous one but with two rows. The first row has the same values as in the previous screenshot. The second row has the following values: Code (empty), Qty (2), Package Type (Pallets), SKU (empty), Description (empty), NMFC (empty), Class (70), Weight (750), L x W x H (14 x 15 x 19), and HazMat (checkbox). The '19' in the height field of the second row is highlighted with a blue border. Below the table is a button with a green plus sign and the text 'Add a Product'.
