

Re-Quoting a Shipment

The Adcco TMS is designed to automatically re-rate a shipment if any of the following pertinent information changes.

- Billing Method
- Origin
- Destination
- Shipping Units

Users can also re-rate a Shipment at any time throughout the Freight Management Process by clicking on the “Get Rates” option.

For example, you create and quoted a shipment today but ended up not shipping the product until a later date. Upon opening the saved quoted load you can select “Get Rates” to update the carrier quotes before booking.

Get Rates

When re-rating a Shipment on a load that is in any status prior to In-Transit the system will automatically change the load status back to Quoted and ask you to reprocess the shipment through the Freight Management Process again.

For Example

A Shipment with a current status of “Booked” is being viewed. The user decides to refresh the rates by selecting “Get Rates”

Status: BOOKED **BOL #: BWS181100002**

Dispatch Load

Actual Carrier: <input type="text" value="OPTIONAL"/>	Manifest / Pro #: <input type="text"/>	BOL#: <input type="text" value="BWS18110000"/>
Pickup#: <input type="text"/>		
<input type="button" value="Submit Pickup Request"/>		<input type="button" value="Dispatch"/>

Once the system has obtained the new rates, the Shipment will automatically be placed back into the “Quoted” status. You will need to Re-book with the carrier at the newly obtained rate.

Status: QUOTED

BOL #: BWS181100002

[Get Rates](#) [Mark an Issue](#) [Combine Loads](#) [Change Status](#) [Cancel Load](#) [Copy Load](#) [Change Client](#) [Backorder Load](#)

Bill of Lading			Edit
Customer Data			
Customer PO: N/A	Invoice ID: N/A	Billing ID: N/A	
Incoterm: N/A	International Tax Number: N/A		
1. Reference:	Reference Type: Customer Reference #	<input checked="" type="checkbox"/> Print on BOL	<input type="checkbox"/> Print on Shipping Label

Changes to critical fields including zip codes, weights, class, or accessorial charges will cause this shipment to automatically remove all previous quotes, and request new quotes with the updated information.
